Volume 140 1984

Table of Contents

No. 1 1–220 issued on April 2, 1984
No. 2 221–446 issued on April 16, 1984
No. 3 447–674 issued on May 2, 1984

Author and Keyword Index Volumes 131–140, 1983/1984 607–673

Corrections 605

Nucleic acids, protein synthesis, and molecular genetics

Nucleotide sequence organization in the very small genome of a tetraodontid fish, *Arothron diadematus*
V. Pizon, G. Cuny, and G. Bernardi 25–30

The influence of sequences adjacent to the recognition site on the cleavage of oligodeoxynucleotides by the *Eco*RI endonuclease
J. Alves, A. Pingoud, W. Haupt, J. Langowski, F. Peters, G. Maass, and C. Wolff 83–92

Nucleotide-mediated interactions of eukaryotic elongation factor EF-2 with ribosomes
O. Nygård and L. Nilsson 93–96

Isolation of the contact regions of the neighboring mammalian ribosomal proteins L6 and L29. Cyanogen bromide cleavage of the disulfide complex after preparative electrophoresis in non-oxidative polyacrylamide gels
H. Nika and T. Hultin 97–104

Catalytical mechanism of the phenylalanyl-tRNA synthetase from yeast. Reactivity of ATP in the absence of phenylalanine
R. Thiebe 143–146

Mechanism of inhibition of polypeptide chain initiation in heat-shocked Ehrlich ascites tumour cells
R. Panniers and E. C. Henshaw 209–214

Studies on the structure and expression of *Escherichia coli pyrC, pyrD* and *pyrF* using the cloned genes
K. F. Jensen, J. N. Larsen, L. Schack, and A. Sivertsen 343–352

Metabolic changes in ribosomes of *Escherichia coli* during prolonged culture in different media
S. Ramagopal 353–361

Rejoining of DNA strand breaks is an early nuclear event during the stimulation of quiescent lymphocytes
A. P. Johnstone 401–406

Cloning of DNA complementary to rat liver fatty acid synthetase mRNA
C. M. Nepokroeff, K. Adachi, C. Yan, and J. W. Porter 441–445

Identification of the altered ribosomal component responsible for resistance to micrococcin in mutants of *Bacillus megaterium*
G. Spedding and E. Cundliffe 453–459

Regulation of ribosome synthesis in *Tetrahymena pyriformis*. 1. Coordination of synthesis of ribosomal proteins and ribosomal RNA during nutritional shift-down
H. Dreisig, P. H. Andreasen, and K. Kristiansen 469–475

Regulation of ribosome synthesis in *Tetrahymena pyriformis*. 2. Coordination of synthesis of ribosomal proteins and ribosomal RNA during nutritional shift-up
H. Dreisig, P. H. Andreasen, and K. Kristiansen 477–483

Regulation of ribosome synthesis in *Tetrahymena pyriformis*. 3. Analysis by translation *in vitro* of RNA isolated during nutritional shift-down and nutritional shift-up
P. H. Andreasen, H. Dreisig, and K. Kristiansen 485–492

Cloning and structure analysis of the rat apolipoprotein A-I cDNA
J. E. Poncin, J. A. Martial, and J. E. Gielen 493–498

Role of signal recognition particle in the membrane assembly of Sindbis viral glycoproteins
S. Bonatti, G. Migliaccio, G. Blobel, and P. Walter 499–502

Multiple ribosome binding to the 5'-terminal leader sequence of tobacco mosaic virus RNA. Assembly of an 80S ribosome-mRNA complex at the AUU codon
K. Tyc, M. Konarska, H. J. Gross, and W. Filipowicz 503–511

Protein chemistry and structure

Sorbitol dehydrogenase. The primary structure of the sheep-liver enzyme
J. Jeffery, E. Cederlund, and H. Jörnvall 7–16

Extensive variations and basic features in the alcohol dehydrogenase – sorbitol dehydrogenase family
H. Jörnvall, H. von Bahr-Lindström, and J. Jeffery 17–23

The interaction of neurotoxin derivatives with either acetylcholine receptor or a monoclonal antibody. An electron-spin-resonance study
A. Rousselet, G. Faure, J.-C. Boulain, and A. Ménez 31–37

Interaction of human α_1-antichymotrypsin with chymotrypsin
A. Laine, M. Davril, and A. Hayem 105–111

Affinity chromatography, on fructose-bisphosphatase–Sepharose, of two chloroplastic thioredoxins F. Purification and comparative molecular properties
J. Buc, M. Rivière, B. Gontero, P. Sauve, J.-C. Meunier, and J. Ricard 199–202

Complete primary structure of the collagen-binding domain of bovine fibronectin
K. Skorstengaard, H. Chr. Thøgersen, and T. E. Petersen 235–243

Discrimination of assembled and disassembled forms of gizzard myosin by papain
A. Kumon, S. Yasuda, N. Murakami, and S. Matsumura 265–271

The size of the pyruvate dehydrogenase complex of *Azotobacter vinelandii*. Association phenomena
H. J. Bosma, A. De Kok, B. W. van Markwijk, and C. Veeger 273–280

Synthetic peptide substrates for the membrane tyrosine protein kinase stimulated by epidermal growth factor
C. House, G. S. Baldwin, and B. E. Kemp 363–367

Initial plasmin-degradation of fibrin as the basis of a positive feed-back mechanism in fibrinolysis
E. Suenson, O. Lützen, and S. Thorsen 513–522

Enzymology

A temperature-jump study of the electron transfer reactions in *Hansenula anomala* flavocytochrome b_2
M. Tegoni, M. C. Silvestrini, F. Labeyrie, and M. Brunori 39–45

Purification and properties of a cAMP-independent nuclear protein kinase from *Dictyostelium discoideum*
M. F. Renart, L. Sastre, and J. Sebastián 47–54

Purification, characterization, and kinetic mechanism of *S*-adenosyl-L-methionine: vitexin 2″-*O*-rhamnoside 7-*O*-methyltransferase of *Avena sativa* L
W. Knogge and G. Weissenböck 113–118

Propionyl-coenzyme A carboxylase of *Mycobacterium smegmatis*. An electron microscopic study
F. C. Haase, H. Beegen, and S. H. G. Allen 147–151

Kinetics for the inhibition of acetylcholinesterase from the electric eel by some organophosphates and carbamates
Å. Forsberg and G. Puu 153–156

Synthesis and properties of (4-^{13}C)NAD$^+$. Observation of its binding to yeast alcohol dehydrogenase by ^{13}C-NMR spectroscopy
M. Oberfrank, W. E. Hull, and J. Retey 157–161

Deoxyribonucleotide biosynthesis in yeast (*Saccharomyces cerevisiae*). A ribonucleotide reductase system of sufficient activity for DNA synthesis
M. Lammers and H. Follmann 281–287

ATP analog specificity of cAMP-dependent protein kinase, cGMP-dependent protein kinase, and phosphorylase kinase
D. A. Flockhart, W. Freist, J. Hoppe, T. M. Lincoln, and J. D. Corbin 289–295

Inactivation of quinoprotein alcohol dehydrogenases with cyclopropane-derived suicide substrates
M. Dijkstra, J. Frank, Jzn, J. A. Jongejan, and J. A. Duine 369–373

Purification and characterization of a protein phosphatase from rat liver acting on key enzymes of glucose metabolism
G. Mieskes, I. A. Brand, and H.-D. Söling 375–383

Characteristic features of an α-galactosidase from mung beans
P. M. Dey 385–390

Interaction of native and modified *Naja melanoleuca* phospholipases A_2 with the fluorescent probe 8-anilinonaphtalene-1-sulfonate
J. H. Van Eijk, H. M. Verheij, and G. H. De Haas 407–413

Biosynthesis of a disialylated sequence in N-linked oligosaccharides: identification of an N-acetylglucosaminide (α2→6)-sialyltransferase in Golgi apparatus from rat liver
J. C. Paulson, J. Weinstein, and U. de Souza-e-Silva 523–530

NAD[S], an NAD analogue with reduced susceptibility to phosphodiesterase. Chemical synthesis and enzymic properties
T. Meyer, K. Wielckens, J. Thiem, and H. Hilz 531–537

A specific disulfide bond associated with the activity of human urokinase. Its topological identification and reductive cleavage followed by kinetic changes in enzymatic reaction and affinity labeling
N. Miwa, T. Sawada, and A. Suzuki 539–545

The role of Na^+ and Ca^{2+} ions on the action of pancreatic lipase studied with the help of immobilisation techniques
A. Schandl and F. Pittner 547–551

Carbohydrates, lipids and other natural products

Chemical behaviour of cytidine 5′-monophospho-*N*-acetyl-β-D-neuraminic acid under neutral and alkaline conditions
J.-M. Beau, R. Schauer, J. Haverkamp, J. P. Kamerling, L. Dorland, and J. F. G. Vliegenthart 203–208

Endotoxic properties of chemically synthesized lipid A part structures. Comparison of synthetic lipid A precursor and synthetic analogues with biosynthetic lipid A precursor and free lipid A
C. Galanos, V. Lehmann, O. Lüderitz, E. Th. Rietschel, O. Westphal, H. Brade,

L. Brade, M. A. Freudenberg, T. Hansen-Hagge, T. Lüderitz, G. McKenzie, U. Schade, W. Strittmatter, K.-i. Tanamoto, U. Zähringer, M. Imoto, H. Yoshimura, M. Yamamoto, T. Shimamoto, S. Kusumoto, and T. Shiba 221–227

Further study of biological activities of chemically synthesized analogues of lipid A in artificial membrane vesicles
T. Yasuda, S. Kanegasaki, T. Tsumita, T. Tadakuma, N. Ikewaki, J. Y. Homma, M. Inage, S. Kusumoto, and T. Shiba 245–248

Characterization and partial purification of two enzymes transferring *N*-acetylglucosamine to dolichyl monophosphate and ribonuclease A
H. Arakawa and S. Mookerjea 297–302

The structure of sialyl-glycopeptides of the *O*-glycosidic type, isolated from sialidosis (mucolipidosis I) urine
D. Lecat, M. Lemonnier, C. Derappe, M. Lhermitte, H. Van Halbeek, L. Dorland, and J. F. G. Vliegenthart 415–420

Isolation and characterization of novel phosphate-containing sialyloligosaccharides from normal human urine
J. Parkkinen and J. Finne 427–431

Biosynthesis of the 09 antigen of *Escherichia coli*. Core structure of *rfe* mutant as indication of assembly mechanism
C. Weisgerber, B. Jann, and K. Jann 553–556

Evidence for the glycoprotein nature of retina glycogen
M. A. Aon and J. A. Curtino 557–566

Shedding of gangliosides from tumor cells depends on cell density
G. I. Shaposhnikova, N. V. Prokazova, G. A. Buznikov, N. D. Zvezdina, N. A. Teplitz, and L. D. Bergelson 567–570

Structural studies on the *O*-linked carbohydrate chains of human platelet glycocalicin
S. A. M. Korrel, K. J. Clemetson, H. Van Halbeek, J. P. Kamerling, J. J. Sixma, and J. F. G. Vliegenthart 571–576

Physical biochemistry

Coordinated two-disk nucleation, growth and properties, of virus-like particles assembled from tobacco-mosaic-virus capsid protein with poly(A) or oligo(A) of different length
A. Schön and K. W. Mundry 119–127

Nuclear-magnetic-resonance studies on the conformations of tridecapeptide α-mating factor from yeast *Saccharomyces cerevisiae* and analog peptides in aqueous solution. Conformation-activity relationship
T. Higashijima, Y. Masui, N. Chino, S. Sakakibara, H. Kita, and T. Miyazawa 163–171

Interaction of the HB protein of *Bacillus globigii* with nucleic acids. Analysis of the binding to DNA and polynucleotides
F. Watanabe, S. Stankowski, and G. Schwarz 215–219

On the intermolecular electron transfer between different redox states of flavodoxin from *Megasphaera elsdenii*. A 500-MHz ^{1}H NMR study
C. T. W. Moonen and F. Müller 303–309

A proton-nuclear-magnetic-resonance study at 500 MHz on *Megasphaera elsdenii* flavodoxin. A study on the stability, proton exchange and the assignment of some resonance lines
C. T. W. Moonen and F. Müller 311–318

Membranes and bioenergetics

Pyridine-nucleotide oxidation, Ca^{2+} cycling and membrane damage during *tert*-butyl hydroperoxide metabolism by rat-liver mitochondria
G. Bellomo, A. Martino, P. Richelmi, G. A. Moore, S. A. Jewell, and S. Orrenius 1– 6

Bacteriorhodopsins with chromophores modified at the β-ionone site. Formation and light-driven action of the proton pump
M. Muradin-Szweykowska, J. A. Pardoen, D. Dobbelstein, L. J. P. van Amsterdam, and J. Lugtenburg 173–176

Factors necessary for the export process of colicin E1 across cytoplasmic membrane of *Escherichia coli*
M. Yamada and A. Nakazawa 249–255

Outer-membrane protein PhoE from *Escherichia coli* forms anion-selective pores in lipid-bilayer membranes
R. Benz, R. P. Darveau, and R. E. W. Hancock 319–324

Doxorubicin inhibits the phosphate-transport protein reconstituted in liposomes. A study on the mechanism of the inhibition
M. Müller, D. Cheneval, and E. Carafoli 447–452

Cellular biochemistry and metabolism

Calmodulin content and activity of Ca^{2+}-ATPase and phospholipase A_2 in rat Kupffer cells
M. Birmelin, D. Marme, E. Ferber, and K. Decker 55– 61

The role of Ca^{2+} uptake in the response of human platelets to adrenaline and to 1-*O*-alkyl-2-acetyl-*sn*-glycero-3-phosphocholine (platelet-activating factor)
K. A. Clare and M. C. Scrutton 129–136

Mechanism of pertussis toxin action on the adenylate cyclase system. Inhibition of the turn-on reaction of the inhibitory regulatory site
K. H. Jakobs, K. Aktories, and G. Schultz 177–181

Saccharomyces cerevisiae mating pheromones specifically inhibit the synthesis of proteins destined to be *N*-glycosylated
P. Orlean, H. Schwaiger, U. Appeltauer, A. Haselbeck, and W. Tanner 183–189

A differential effect of trypsin on pituitary gonadotropin-releasing hormone receptors from intact and ovariectomized rats. Evidence for the existence of two distinct receptor populations
M. Liscovitch, N. Ben-Aroya, R. Meidan, and Y. Koch 191–197

Predominance of glycolysis in pericentral regions of the liver lobule
T. Matsumura and R. G. Thurman 229–234

Glucagon inhibits fatty acid synthesis in isolated hepatocytes via phosphorylation of acetyl-CoA carboxylase by cyclic-AMP-dependent protein kinase
R. Holland, L. A. Witters, and D. G. Hardie 325–333

Partial purification and characterization of a 60000-dalton phosphoprotein from pig heart tissue
T. David-Pfeuty and A. Hovanessian 335–342

Formation of the triple helix of type I procollagen *in cellulo*. Temperature-dependent kinetics support a model based on *cis* ⇄ *trans* isomerization of peptide bonds
P. Bruckner and E. F. Eikenberry 391–395

Procollagen is more stable *in cellulo* than *in vitro*
P. Bruckner and E. F. Eikenberry 397–399

Interferon receptor interaction. Internalization of interferon α_2 and modulation of its receptor on human cells
F. H. Sarkar and S. L. Gupta 461–467

Asialoorosomucoid degradation by normal and diabetic rat hepatocytes
M. Dodeur, S. Coumoul, P. Scarmato, G. Durand, J. Feger, and J. Agneray 577–581

The catalytic cycle of cytochrome P-450scc and intermediates in the conversion of cholesterol to pregnenolone
R. Hume, R. W. Kelly, P. L. Taylor, and G. S. Boyd 583–591

The reaction of 16α-hydroxyestrone with erythrocytes *in vitro* and *in vivo*
R. Bucala, J. Fishman, and A. Cerami 593–598

Developmental biochemistry and immunology

Blockade of the galactose-binding sites of ricin by its linkage to antibody. Specific cytotoxic effects of the conjugates
P. E. Thorpe, W. C. J. Ross, A. N. F. Brown, C. D. Myers, A. J. Cumber, B. M. J. Foxwell, and J. T. Forrester 63– 71

Monoclonal anti-glycoprotein antibody that blocks cell adhesion in *Polysphondylium pallidum*
K. Toda, S. Bozzaro, F. Lottspeich, R. Merkl, and G. Gerisch 73– 81

Isoforms of an endogenous lectin in rabbit bone marrow
J. E. Fitzgerald, J. W. Catt, and F. L. Harrison 137–141

Ribonucleoprotein particles from *Xenopus* eggs and embryos. Neural-archencephalic-inducing activity of the protein moiety
J. Janeczek, J. Born, M. John, M. Scharschmidt, H. Tiedemann, and H. Tiedemann 257–264

Diamine-induced dissociation of the first component of human complement, C1
C. L. Villiers, G. J. Arlaud, and M. G. Colomb 421–426

Structural characteristics of the mouse transferrin receptor
A. Van Agthoven, C. Goridis, P. Naquet, A. Pierres, and M. Pierres 433–440

Mapping of surface glycoproteins of *Trypanosoma cruzi* by two-dimensional electrophoresis. A correlation with the cell invasion capacity
N. W. Andrews, A. M. Katzin, and W. Colli 599–604

Indexed in Current Contents
